

I listen to K-LOVE, 100.1 FM, exclusively, because it is the only station in my area that plays music that I like without objectionable content in commercials or programming. It is my only source of broadcast news because I find TV content to have unacceptable moral values, including the commercials.

K-LOVE is always encouraging and uplifting and makes our community a better place to live. I also find their notifications about local non-profit events to be useful. It would be a major loss to have an established station like K-LOVE, with such good integrity, to be replaced by stations with standards that will, most likely, be lower and cruder.
